Course Description: This is a 1 credit course that requires an identification of the major insect, mite, and tick vectors of disease to man and animals and an understanding of the diseases transmitted by arthropod vectors. Students will learn to identify mosquitoes, ticks, mites, lice, fleas, and other disease vectors. This course requires use of the textbook and internet resources to obtain detailed information on the appearance of medically and veterinary important arthropods, as well as the cycles for the diseases they transmit. This course should be taken as a co-requirement for ENY 6665. The schedule for ENY 6665 will have the due dates for the laboratory assignments.

Critical Thinking: With international travel and movement of people from place to place, it is difficult to determine the origins of a disease outbreak. Students will be expected to identify the vector, pathogen, and location of a person associated with a vector-borne disease.

Laboratories: Assignments are laboratory activities located at the Canvas website. The site is restricted to only students officially enrolled in the class.

Students can do the on-line laboratory activities as often as necessary until the due date and will get credit for the best grade obtained for each assessment. Additionally, there will be a laboratory exam 1, laboratory exam 2, and final exam given as timed exams on Canvas that can only be taken once. The final grade will be for a total of 1,000 points.

Laboratory assessments (29 unweighted) 200 points

The percentage is then applied to the grading scale. Laboratory exams 1 & 2 and identification exams are not comprehensive and will be timed exams located on Canvas. Final exams (lecture and laboratory) will be comprehensive and also located on Canvas.
