

Medical and Veterinary Entomology Laboratory 4660L

Fall 2013 Syllabus

Instructor: Dr. Phil Kaufman, pkaufman@ufl.edu Tel: 352-273-3975

Teaching Assistant: Chris Holderman, chrish2@ufl.edu Tel: 352-273-3981

Meeting time and place: 6th – 8th Period Tuesday (12:50 – 3:50 PM), 3118 Entomology Nematology Building

Course description:

Medical and Veterinary Entomology Laboratory is a 1-credit class that provides students the opportunity to observe and handle the specimens discussed in the companion lecture of this course. Laboratory exercises are designed to reinforce concepts introduced during the companion lecture and provide hands-on viewing of arthropods for future identification. Some students may be making pest management decisions in the future; it is therefore essential that they be able to properly identify the pest that they are attempting to manage. This is increasingly important as the ecological and social pressures increase for control of non-specific arthropod pests with minimal effects on human health and the environment. Students will be given the opportunity to learn about evolving relationships that many of the species have developed in order to survive as an ectoparasite and/or serve as an efficient vector. Several evaluation methods including laboratory quizzes, laboratory exams and a collection will be administered so that students can demonstrate their knowledge of arthropod identification, pest importance to human and animal health and effective management tactics. We will take several trips to local sites during the laboratory session where students will have the opportunity to examine issues on site and to obtain specimens for their collections. Transportation will be provided.

Learning Objectives: Students who have completed this course will be able to:

1. Identify the major pests of veterinary entomology and provide pest management solutions.
2. Learn to recognize the diversity of arthropods of medical and veterinary importance.
3. Learn the biology and ecology of the primary pests of importance
4. Compare and contrast the life-history strategies used by major vector and pest species of medical and veterinary importance.
5. Compare the variety of taxa and recognize that this is but an example of the diversity in the world.

Textbook: Lab manual:

Required - Furman, D.P and E. P. Catts. Manual of Medical Entomology. 4th edition. Cambridge University Press, London. (**Provided via loan** from Dr. Kaufman).

Additional insect keys for use in class and in your take home practical and insect collection can be found here.

Manual on livestock ticks

Whitworth blow fly key

Immature Coleoptera

CDC Keys

Orange “Keys to FL Mosquitoes”

Websites: <http://fmel.ifas.ufl.edu/key/>

http://fmel.ifas.ufl.edu/key/id_tables/idtables_adult.shtml

Sakai

This course utilized the Sakai system at the University of Florida.

<https://elearning2.courses.ufl.edu/portal> Course materials, including PowerPoints (as PDF’s) will be placed on this site for full student access. The instructor reserves the right to remove these files at his discretion and will do so if attendance at lectures is poor. Additionally, student grades will be posted as they are finalized.

Office Hours: Dr. Kaufman will be available to students on Wednesday’s from 10:00 AM – 11:00 AM and by appointment in Room 3213. pkaufman@ufl.edu Tel: 352-273-3975.

Chris Holderman will be available to students on Thursday’s from 2:00 PM until 3:00 PM and by appointment in Room 3219.. chrish2@ufl.edu Tel: 352-273-3981

Grading: All graded material remains the property of the teacher, and any unreturned exam, quiz or assignment will result in a grade of zero. Grading criteria are specific for each course listing. This course does NOT utilize “minus” grades. Information on UF’s grading policies can be found at: <https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx>

The grading scale for this course is as follows:

Grading scale (%):

90-100	A
88-89	B+
80-87	B
78-79	C+
70-77	C
60-69	D
<60	E

ENY 4660L	Point Value	Total
Lab Practical	50	50
Individual Practical	50	50
Collection	50	50
Lab weekly quizzes (10)	10 each	100

Specific Laboratory Evaluations: Identification of arthropods of medical and veterinary entomology is paramount to their successful management. Therefore, students are provided a variety of opportunities to demonstrate their capabilities in specimen identification. **Students in the laboratory component of this class are evaluated through four measures.** Total points for this course are 250. Your grade is determined according to the scale provided earlier.

1. Insect Collection. The collection consists of 50 specimens of medical and veterinary importance and is required of all students in ENY 4660. An initial description is provided below and additional instruction is provided in a separate handout provided in laboratory. Collections are due at **Noon on November 19, 2013.**
2. Standard Laboratory Practical. This exam will consist of a time-monitored, sight identification test of each student's skills and will be administered in your assigned laboratory section on **October 15, 2013.** Due to the difficulty in setting up this exam, a make-up exam **must** be approved by the instructor, must be scheduled **prior to the exam** and are given only under special circumstances. The make-up exam will be administered with the other section's exam.
3. Individual Practical. Each student will be provided with 25 unknown specimens that they are responsible for providing identifications and a Microsoft Excel sheet to insert their answers (also provided). This "Individual Practical" will occur on **December 03, 2013.**
Students are responsible for identifying specimens to the level required for class. All specimens are from the "multi-colored" insect specimen sheet. Students should have this document with them on the exam date and are welcome to use any keys or notes that they have acquired during this class. Each collection is unique and students are required to complete this alone and during the 3-hr laboratory period. Hand-written Excel sheets are to be turned in. No electronic devices are allowed during this evaluation. Prepare yourself accordingly.
4. Weekly Quizzes. Ten (10) weekly laboratory quizzes will be administered. Unlike the lecture quizzes (ENY 4660), all laboratory quizzes directly impact the student's grade and are **NOT** bonus points. Quizzes will be given at approximately 3:20 PM and will last no longer than 30 min.

Collection Requirements: Students in ENY 4660 are required to develop and submit an insect collection containing at least 50 different species of medical or veterinary importance. Students must be prepared to defend the inclusion of the specimens and are required to provide a listing of all specimens and their importance. Collections are due no later than **NOON on November 19, 2013.** Additional and specific instructions are provided on the Collection Requirements document. For each business day that collections are late, 10 points will be deducted from the

possible score. Late collections, with penalty, must be delivered to room 3213 or 3237 and handed to Dr. Kaufman before Noon of each day. The [MS Excel template](#) that must be used and the grading rubric are provided (See Sakai Home page).

Attendance: Students are expected to attend each class period and stay for the entire period. The laboratory is several periods long and students are allowed to leave at their leisure. Considerable material is provided in the laboratory session and students who do the best in this course are those that utilize this unique opportunity to study specimens in depth. Additionally, [students that do stay for the entire period](#) are welcome to examine specimens outside of the laboratory periods in Dr. Kaufman's research laboratory in room 3237 (provided certain limitations discussed in class). Access is a privilege, not a right.

Tentative Laboratory calendar:

Laboratory	Date	Topic
1	Aug. 27	Arthropod morphology, taxonomy, insect orders, mouthparts, fly feeding
2	Sept 03	Dichotomous keys, collection instructions, collection materials, Insect identification to Order (Quiz 1)
3	Sept. 10	ID Hemiptera, lice, spiders, Hymenoptera, cockroaches & others. (Quiz 2)
4	Sept. 17	Field trip - BTU & HTU - surveillance and sampling mosquitoes
5	Sept. 24	Identification of fleas, Nematocera and Brachycera (Quiz 3)
6	Oct. 01	Identification of mosquito larvae (Quiz 4)
7	Oct. 08	Identification of mosquito adults (Quiz 5 – mosquito larvae)
8	Oct. 15	Lab Practical 1 Forensic Entomology
9	Oct. 22	Biological Control I Identification of muscoid fly adults and immature Diptera (Quiz 6 – mosquito adults)
10	Oct. 29	Identification of ticks (Quiz 7 – Muscoid flies)
11	Nov. 05	Identification of mites (Quiz 8 – Immature Diptera)
12	Nov. 12	Fly/Lice Video Work on collections Quiz 9 (Ticks)
13	Nov. 19	Blood meal analysis I Biological control II Collections due Nov. 19, 2013 before NOON
14	Nov. 26	Blood meal analysis II Quiz 10 - (Mites and Labs 8-13)
15	Dec. 03	Individual Practical

Additional General Information: The following information applies to all courses at the University of Florida.

Absences and Make-Up Work

Requirements for class attendance and make-up exams, assignments and other work are consistent with university policies that can be found at:

<https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx>.

Academic Honesty

As a student at the University of Florida, you have committed yourself to uphold the Honor Code, which includes the following pledge: *“We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity.”* You are expected to exhibit behavior consistent with this commitment to the UF academic community, and on all work submitted for credit at the University of Florida, the following pledge is either required or implied: *“On my honor, I have neither given nor received unauthorized aid in doing this assignment.”*

It is assumed that you will complete all work independently in each course unless the instructor provides explicit permission for you to collaborate on course tasks (e.g. assignments, papers, quizzes, exams). Furthermore, as part of your obligation to uphold the Honor Code, you should report any condition that facilitates academic misconduct to appropriate personnel. It is your individual responsibility to know and comply with all university policies and procedures regarding academic integrity and the Student Honor Code. Violations of the Honor Code at the University of Florida will not be tolerated. Violations will be reported to the Dean of Students Office for consideration of disciplinary action. For more information regarding the Student Honor Code, please see: <http://www.dso.ufl.edu/SCCR/honorcodes/honorcode.php>.

Software Use:

All faculty, staff and students of the university are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against university policies and rules, disciplinary action will be taken as appropriate.

Campus Helping Resources

Students experiencing crises or personal problems that interfere with their general well-being are encouraged to utilize the university’s counseling resources. The Counseling & Wellness Center provides confidential counseling services at no cost for currently enrolled students. Resources are available on campus for students having personal problems or lacking clear career or academic goals, which interfere with their academic performance.

Counseling Services

Groups and Workshops

Outreach and Consultation

Self-Help Library
Training Programs
Community Provider Database

· *Career Resource Center*, First Floor JWRU, 392-1601, www.crc.ufl.edu/

Services for Students with Disabilities

The Disability Resource Center coordinates the needed accommodations of students with disabilities. This includes registering disabilities, recommending academic accommodations within the classroom, accessing special adaptive computer equipment, providing interpretation services and mediating faculty-student disability related issues. Students requesting classroom accommodation must first register with the Dean of Students Office. The Dean of Students Office will provide documentation to the student who must then provide this documentation to the Instructor when requesting accommodation

Plagiarism

Plagiarism is a serious problem in academia today, especially with the ease of obtaining information from the World Wide Web. Plagiarism is defined as representing the words or ideas of another person as one's own, without attribution to the source. All words and ideas must be attributed to a source unless they are considered common knowledge (i.e., widely known by many people and found in many different sources). There are many kinds of plagiarism, as you will read on the Guide to Plagiarism website referenced below.

Plagiarism is unethical, unacceptable in science, and prohibited by the UF Student Honor Code (<http://www.dso.ufl.edu/sccr/honorcodes/honorcode.php>). The consequences for plagiarism while at the University of Florida range from receiving a grade of zero for the plagiarized assignment or a failing grade for the course, to, for repeated offenses, expulsion from the university. Plagiarism after graduate training calls into question one's scientific integrity and can lead to banning of publication in journals and the loss of jobs/careers.

In some countries, it is an acceptable practice to write in a manner that faculty members at the University of Florida consider to be plagiarism. Students studying in our university and with plans to publish their research in the English language need to know what plagiarism is and how to avoid it.

Students who plagiarize will be caught and consequences will be applied. Many faculty in our department check all written assignments using an anti-plagiarism software called Turnitin® (<http://www.at.ufl.edu/~turnitin/about.html>).

For further information and examples of plagiarism, I **strongly suggest** that you please read the George Smathers' Library Guide to Plagiarism at http://www.uflib.ufl.edu/msl/services/tutorials/plagiarism/student_intro.html

Please understand that our purpose in bringing to your attention the matter of plagiarism is to help train you to be ethical scientists, not to impugn your character.
